Cigna Hong Kong Launches New Health Insurance Solution for Women

Plan offers all-round protection for women at different life stages

HONG KONG – March 13, 2019 – Cigna Corporation (NYSE:CI) in Hong Kong today launched **Cigna Healthsecure Lady Care Plan**, the first health insurance solution in Hong Kong that combines the benefits of medical care with prevention and financial protection for women at different life stages, in the event of a critical illness.

According to the 2018 Cigna 360^o Well-Being Survey, women in Hong Kong feel less secure than men about their financial ability to meet their medical needs, and are less prepared to deal with uncertainties in the future. The survey reveals that only 12% of women have financial security if they get sick and become unable to work.

Yuman Chan, CEO and Country Manager, Cigna Hong Kong, said: “Like many women around the world, we understand that women in Hong Kong are juggling multiple roles in their lives. We know that there is more we can do to help them protect their own health and wellness so that they are better equipped to cope with unexpected events - from dealing with cancer to pregnancy related issues. This is why we have developed Cigna Healthsecure Lady Care Plan which will enable women to take control of their whole person health - physically, emotionally and mentally – and also ensure they have financial protection in place if they are unable to work.”

The product offers a holistic solution to support medical expenses for treatment and recovery, replacing women’s financial worries with peace of mind. Key features include up to HK\$60,000 per month of income protection on diagnosis of a critical illness for up to a maximum of 24 months. It also provides protection for multiple critical illness claims, with a lifetime limit of up to HK\$1,800,000 for hospital and surgical expenses due to a critical illness. Customers can also get a complimentary genetic test which will identify their unique nutrient needs and optimal diet type. They can also learn their body’s response to certain foods such as caffeine or carbohydrate. The plan includes psychiatric outpatient treatment benefits, physical and mental health support and access to an Employee Assistance Program (EAP) hotline staffed by registered counsellors and psychologists, who can support members on stress related issues.
